

HeurekaNet - Freies Institut für Bildung, Forschung und Innovation e.V.

Short description:

Project "Flip Edu Up" (FEU)

Description of situation and problems:

Adult learning is an important part of the lifelong learning spectrum, which includes formal, non-formal and informal learning activities undertaken by adults. The efforts made so far in the field of lifelong learning are undoubtedly a necessary investment. However, the European Union Labour Force Survey and the Adult Education Survey in Europe (AES) show that the strategic target of at least 15% of 25-64 year old adults participating in lifelong learning has not yet been reached in the vast majority of countries.

Target group and goal/tasks:

The project will target European adult education centres and adult educators searching for support to improve their competences in teaching and digital skills in order to digitalise their teaching programmes and engage adult learners.

Project content:

Project foresees to realise 2 Intellectual Outputs (IO), Staff training activity (International Pilot testing, Local Pilot testing), series of webinars, podcasts, interviews, articles, 4 Multiplier Events and 1 final conference. The IO 1 will be a manual "Methodology, Quality Assurance and Evaluation for Blended Learning Approach in adult education", the IO 2 an E-platform ("Community of innovators") whose multilingual e-courses and social learning area will enable autonomous learning by educators in partner countries and in Europe. This E-learning platform will consist of 2 main elements: i) Practical online courses for educators/trainer to access and receive support from the course creators when embarking on in the Blended Learning journey, and ii) Learning space (community of innovators), which will allow users to come together and learn from each other interactively.
