

HeurekaNet - Freies Institut für Bildung, Forschung und Innovation e.V.

Short description:

Project "STREAMpreneur"

Description of situation and problems:

The importance of STEAM education has been widely acknowledged across Europe and is in high demand. The EU has set ambitious goals: to promote smart, sustainable and inclusive growth, to find pathways to create new jobs and to offer a sense of direction to our societies. ("Europe 2020: Commission proposes new economic strategy in Europe"). In the future, increasingly focused on innovation, inclusion and sustainability, STEAM education and entrepreneurship will be more linked than ever before as they go hand-in-hand. By introducing research (R) and arts (A) to traditional STEM, as one of the core elements of discovering new knowledge, STREAM (science, technology, research, engineering, art and math), will provide a well-rounded learning experience.

Target group and goal/tasks:

Thus, the project "STREAMpreneur" aims to improve youth entrepreneurial skills, promote innovation and sustainable solutions to real-life problems existing in Europe and beyond, by introducing "STREAM Entrepreneurship" among youth workers and providing them with knowledge and tools to implement it their daily youth work.

Project content:

Project foresees to realise 2 Intellectual Outputs (IO), Staff training activity and blended learning training activity (International Pilot testing, Local Pilot testing), series of webinars, podcasts, interviews, articles, 4 Multiplier Events and 1 final conference. IO 1 "Guidelines for "STREAM Entrepreneurship" approach implementation in youth work" will provide guidance to organisations active in youth work regarding integration of STREAM Entrepreneurship approach in their activities/programmes for youth. The IO 2 "E-course platform - Empowering Drivers for Future Growth" will offer e-courses to support youth workers/trainers in their utilisation of the STREAM entrepreneurship approach in their activities/programmes with youth. An important element of the platform is also a space for social learning, where users can exchange knowledge, good practise, etc, learn from and empower each other.
